Cloud computing (standard courseware)

Time: 40 Hours | Classes: 4hrs *10Days

Topics covered:

1. **Elastic Computing (computing)** **Day 1**
    a. Introduction
    b. Types
    c. Create & launch
    d. Create snapshot
    e. Backup as AMI
    f. Restore from AMI
2. **Security Practice (basic do & don't tips)** **Day 1**
    a. Introduction
    b. Define security rules
    c. Allow / deny port access
    d. IP whitelisting
    e. Using public IP Pool
3. **S3 storage (Storage)** **Day 2**
    a. Introduction
    b. Create S3 storage
    c. Static website hosting
    d. Cross-region replication
    e. Backup /restore
    f. Delete
4. **AWS marketplace (Marketplace)** **Day 3**
    a. Introduction
    b. How to use
    c. Share Community AMI to marketplace
5. **AWS IAM (security)** **Day 4**
    a. Introduction
    b. Types
    c. Create users/group
    d. Deploy policy
    e. Revoke access
6. **AWS EFS (elastic File System)** **Day 5**
    a. Introduction
7. **AWS RDS/ dynamo DB (Database)** **Day 6**
    a. Introduction
    b. Implementation
    c. Get CLI command mode
8. **AWS cloud Front (CDN, Storage)** **Day 7**
    a. Introduction
    b. How to use

9. **Route 53 (DNS Server)** **Day 8**
    a. Introduction
    b. Implementation
    c. Add /modify/ remove A, AAAA, CNAME records
10. **VPC (Private cloud, networking)** **Day 9**
    a. Introduction to private & Public cloud
    b. How to implement VPC
    c. Add / remove services in VPC
11. **Cloud watch (monitoring services, automate task)** **Day 10**
    a. Introduction
    b. How to use cloud watch
    c. Schedule task with cloud watch
